A Full-Stack Web Developer with a background in operations management who graduated from UPenn's LPS Coding Bootcamp. With proficient skills in JavaScript, CSS, Node.js, Express.js, MongoDB, and React.js. Noted as being a collaborative problem solver who is focused on developing responsive applications that help find better solutions to everyday problems. Developed a restaurant search application that takes the user's location via geo coordinates and displays the top three restaurants near them based on the cuisine that they have inputted. By limiting the options to just the top three restaurants it helps eliminate fear of missing out (FOMO) for the user as well as it allows them to make a quicker decision and not spend as much time browsing. Excited to implement new ideas and strategies and collaborate with fellow developers and employers.

TECHNICAL SKILLS

Node.js, Express, JavaScript, jQuery, React.js, Github, MongoDB, MySQL, Sequelize, HTML, CSS, Bootstrap, APIs, JSON, REST, AJAX, the command line

APPLICATIONS BUILT

TripTips | Web Developer | <https://grouptriptips.herokuapp.com>

- A travel itinerary creator, displays and shares travel plans with users all across the country.
- Built back end in Node.js, enabled Nodemailer to send itineraries to users emails.

WishDish | Web Developer | <https://dioris-cpu.github.io/group-Project-1/#>

- An efficient restaurant search application that displays the top restaurants based on the users geolocation and cuisine of choice.
- Built front end in Javascript, queried data from multiple APIs in order to display restaurants nearby.

EatDaBurger | Web Developer | <https://intense-chamber-29665.herokuapp.com>

- A burger creator app that allows users to choose which burger they will eat.
- Built back end in Sequelize, functionality that allows users to create their own burger, devour all while this data is being stored and updated.

EXPERIENCE

Gopuff

7/2018

Operations Manager

- Manage over 50 employees.
- Manage a warehouse.
- Set up delivery routes for drivers that ensure that both the customer and drivers needs are met in the quickest and safest way possible.

EDUCATION

University of Pennsylvania, Philadelphia, PA
Certificate - Javascript Full Stack Web Development
